AREA V
RESEARCH

S.1. The institution has an approved and copyrighted Research Journal.

Parameter D – Publication and Dissemination

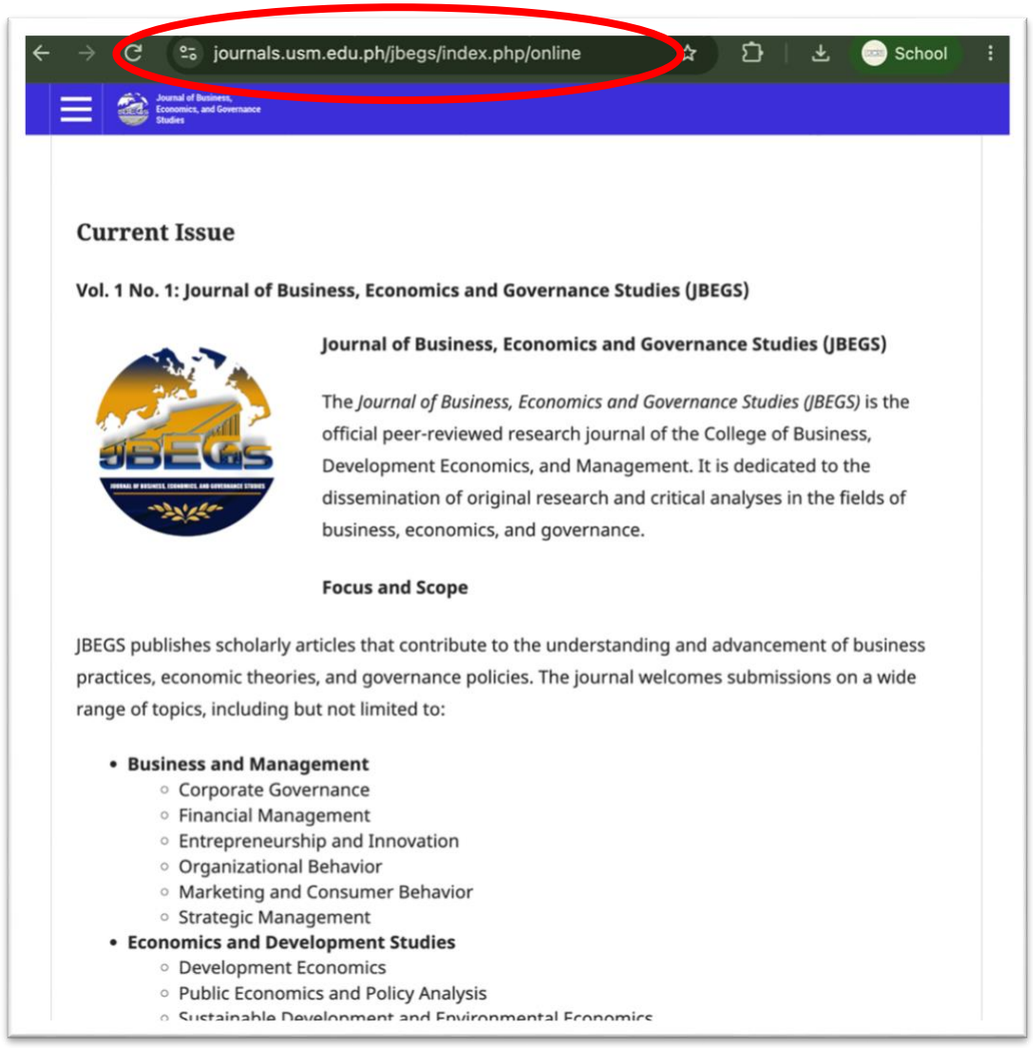

The institution has an approved and copyrighted Research Journal.

The Journal of Business, Economics, and Governance Studies (JBEGS) is the official peer-reviewed research journal of the College of Business, Development Economics, and Management of the University of Southern Mindanao (USM). It serves as an academic platform for the publication and dissemination of original research, scholarly analyses, and evidence-based studies that contribute to the advancement of knowledge and practice in business, economics, and governance.

JBEGS welcomes scholarly contributions from researchers, academicians, practitioners, and policymakers covering various areas, including business and management, financial management, entrepreneurship, development economics, agricultural economics and agribusiness, public administration, and governance. Through these areas of research, the journal seeks to generate valuable insights that can inform business decisions, improve institutional practices, support evidence-based policymaking, and promote sustainable socioeconomic development.

As a peer-reviewed and open-access journal, JBEGS promotes the wider dissemination of research findings by providing free online access to its published articles. It upholds publication integrity through established ethical standards, originality requirements, and a double-blind peer-review process. The journal also provides a platform for researchers to share relevant findings and contribute to the development of their respective disciplines. Furthermore, it does not charge article processing fees, helping make scholarly publication more accessible to researchers.

Through JBEGS, the University of Southern Mindanao strengthens its commitment to research excellence, knowledge sharing, and the application of research to real-world challenges. The journal provides opportunities for faculty members, researchers, and other scholars to disseminate their work, foster academic collaboration, and contribute to informed decision-making and sustainable development at the local, regional, and national levels.
