# AREA VIII

# PHYSICAL PLANT AND FACILITIES

**S.2. THE CAMPUS HAS ACCESSIBLE GOOD ROADS AND PATHWAYS.**

**S.2. The Campus has accessible good roads and pathways.**

The University takes pride in its well-maintained and accessible road network that surrounds and runs through the campus, ensuring safe and convenient mobility for all members of the academic community. These well-paved roads are wide enough to accommodate the steady flow of vehicles and are regularly maintained to prevent hazards and ensure smooth transportation. Designated pedestrian lanes are clearly marked and strategically located along busy areas to prioritize the safety of students, faculty, staff, and visitors as they move from one area of the campus to another.

To further enhance accessibility, the University has constructed covered walkways that interconnect various colleges, departments, administrative offices, and other campus facilities. These covered paths not only provide shade and protection during hot or rainy weather but also promote walkability within the campus, encouraging a healthier and more environmentally friendly mode of movement.

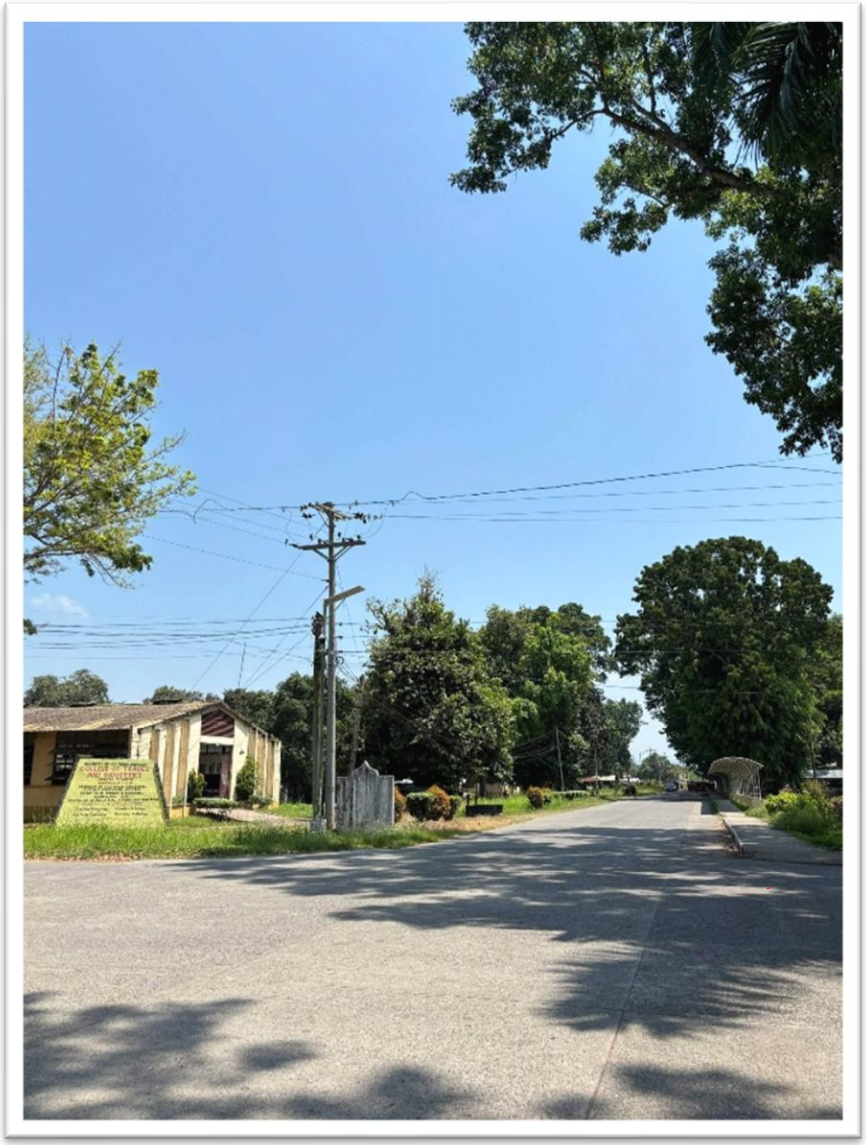

Moreover, road and directional signage are visibly installed in key areas across the campus. These include speed limit signs, pedestrian crossing markers, building identifiers, and directional arrows that guide both drivers and pedestrians safely to their destinations. The signage system plays a crucial role in maintaining order, reducing traffic confusion, and minimizing the risk of accidents.

The University's commitment to ensuring a safe, accessible, and user-friendly campus environment is evident in the thoughtful design, upkeep, and continuous improvement of its road and pathway systems.
