

The vision, mission, goals, and objectives of a university serve as its guiding framework. The vision outlines the institution's long-term aspirations, while the mission defines its core purpose and responsibilities. The goals provide broad targets aligned with the mission, and the objectives break these into specific, measurable actions. Together, they ensure that all programs, activities, and decisions support a unified direction, fostering academic excellence, institutional integrity, and continuous development.

A.1. Vision Statement
